## **Guidelines for Manuscript Preparation and Submission: Observational study**

**Core tip:** *Observational Study* articles are submitted by any author and describe a clinical study in which participants may receive diagnostic, therapeutic or other types of interventions, but the investigator does not assign participants to receive specific interventions (as in an interventional study).

For the initial submission, authors can conveniently make their first upload of their manuscript without restrictions on writing style, file format, or need for accompanying relevant documents. However, it is recommended that the content be written as a high-quality academic article before submitting, according to the following checklist.

### **1 FIRST SECTION OF MANUSCRIPT WRITING [YES or NO]**

- 1.1 Title [      ]
- 1.2 Authorship [      ]
- 1.3 Institution [      ]
- 1.4 ORCID number [      ]
- 1.5 Supportive foundations [      ]
- 1.6 STROBE Statement [      ]
- 1.7 Corresponding author [      ]
- 1.8 Abstract [      ]
- 1.9 Key words [      ]
- 1.10 Core tip [      ]

## **2 SECOND SECTION OF MANUSCRIPT WRITING [YES or NO]**

- 2.1 Main text [      ]
- 2.2 Biostatistics [      ]
- 2.3 Units [      ]
- 2.4 Illustrations [      ]
- 2.5 Tables [      ]
- 2.6 Notes in illustrations and tables [      ]
- 2.7 Abbreviations [      ]
- 2.8 Italics [      ]
- 2.9 Acknowledgements [      ]
- 2.10 References [      ]

## **3 ETHICS POLICIES/STATEMENTS [YES or NO]**

- 3.1 Institutional review board [      ]
- 3.2 Informed consent [      ]
- 3.3 Conflict-of-interest [      ]

## 1 FIRST SECTION OF MANUSCRIPT WRITING

All contributions should be written in English; the authors may use either UK or US English language, but the chosen English language usage must be consistent throughout the document. All articles should be prepared with Word-processing software, using 12 pt Book Antiqua font and 1.5 line spacing with ample margins. Required information for each of the manuscript sections is as follows:

**1.1 Title.** The title should be no more than 18 words. It should summarize the core content of the manuscript, so that the reader may readily understand the key concepts and important findings presented within. This type of succinct and impactful statement will serve to catch readers' attention and stimulate their interest in reading the abstract and/or downloading the full paper. It is also strongly recommended that the title include one or two of the key words associated with the manuscript's topical content, to facilitate the paper being readily found by electronic searches of public databases, such as by Google or in PubMed. Finally, words such as 'exploration', 'research', 'analysis', 'observation', and 'investigation' are to be avoided. The title should not start with 'A', 'An', or 'The' and will not include any Arabic numbers or abbreviations.

**1.2 Authorship.** Authorship credit should be given in accordance with the standard proposed by the International Committee of Medical Journal Editors (ICMJE) (<http://www.icmje.org/>). Specifically, authorship is merited by (1) substantial contributions to conception and design of the study, acquisition of data, or analysis and interpretation of data; (2) drafting the article or making critical revisions related to important intellectual content of the manuscript; and (3) provision of final approval of the version of the article to be published. Authors should meet conditions 1, 2 and 3.

We consider requests for co-first/co-corresponding authors on a limited basis, making the final decision to allow/deny according to the detailed reasons provided by the

authors for justification on a case-by-case basis, with allowance permitting no more than 2 co-first/co-corresponding authors. For the *policy of allowing co-first authors and co-corresponding authors* who made equal contribution to a manuscript, please visit: <https://www.wjgnet.com/bpg/GerInfo/310>.

Author names (unabbreviated) should be given as first name, middle name initial (with no period) and family (sur) name, and typed in bold with the first letter capitalized; a hyphen should be included between the syllables of Chinese names. For example, **Jason Lamontagne, Laura F Steel, Paul V Harper Jr, Bo Yuan, and Wei-Hong Tang**.

**1.3 Institution.** Author names should be written out first (as first name, middle name initial (with no period) and family (sur)name; with a hyphen included between the syllables of Chinese names) and typed in bold, followed by a comma and the complete name of the affiliated institution, city, province/state, postcode and country typed in non-bold. For example:

**Xu-Chen Zhang, Li-Xin Mei,** Department of Pathology, Chengde Medical College, Chengde 067000, Hebei Province, China

In the case that multiple authors represent a single institution, the authors will be listed together for that institution. For example:

**Giuseppe Losurdo, Domenico Piscitelli, Antonio Giangaspero, Mariabeatrice Principi, Francesca Buffelli, Floriana Giorgio, Lucia Montenegro, Claudia Sorrentino, Annacinzia Amoruso, Enzo Ierardi, Alfredo Di Leo,** Gastroenterology Section, Department of Emergency and Organ Transplantation, University of Bari, Bari 70124, Italy

In the case that one author represents multiple institutions, the institutions will be listed separately. For example:

**Jun Wen,** Department of Liver Surgery and Liver Transplantation Center, West China Hospital, Sichuan University, Chengdu 610041, Sichuan Province, China

**Jun Wen**, Department of General Surgery, The Third People's Hospital of Chengdu, Chengdu 610031, Sichuan Province, China

**1.4 ORCID number.** ORCID provides a persistent digital identifier that distinguishes each researcher from every other researcher globally and, through integration in key research workflows such as manuscript and grant submissions, supports automated linkages between an individual researcher and their own professional activities, thereby ensuring that their work is recognized accurately in a distinctive manner. Please visit the ORCID website at <https://orcid.org/> for more information. The corresponding author must provide his/her personal ORCID registration number.

**1.5 Supportive foundations.** The approved grant application form(s) will be released online, together with the manuscript in order for readers to obtain more information about the study and to increase the likelihood of subsequent citation. Our purpose of publishing the approved grant application form(s) is to promote transparent academic communication, accelerate scientific progress in the related field, and improve effective and productive sharing of research ideas.

**Supportive foundation acknowledgment:** The complete name(s) of supportive foundation(s) and identification number(s) of grants or other financial support will be provided on the title page of all submitted manuscripts using the following format:

**Supported by** the National Natural Science Foundation of China, No. 30224801.

**1.6 STROBE Statement.** In order to improve the quality of Observational Study manuscripts, authors should download and complete the 'STROBE Statement – checklist

of items' to ensure that the manuscript meets the requirements of the STROBE Statement. Authors must state in the Footnotes section of the manuscript that the guidelines of the STROBE Statement have been adopted (see below).

**Sample wording:** The authors have read the STROBE Statement – checklist of items, and the manuscript was prepared and revised according to the STROBE Statement – checklist of items.

**1.7 Corresponding author.** The corresponding author's contact information will be provided in the following format: written out first name, middle name initial (with no period) and family (sur)name (with a hyphen included between the syllables of Chinese names), and followed by the relevant honorifics (such as PhD, MD, Chief of Surgery, Assistant Professor, *etc*), all typed in bold and ending with a comma. This will be followed immediately by the corresponding author's professional affiliation (non-bold text), written out as complete name of institution, present address, city, province/state and postcode, and country and ending with a period. Immediately following the ending period and a single space will be the corresponding author's E-mail address; this E-mail address must be issued by his/her institution. All the letters in the E-mail address should be typed in lowercase. For example:

**Andrzej S Tarnawski, MD, PhD, DSc (Med), Professor, Chief,** Department of Gastroenterology, VA Long Beach Health Care System, University of California, Irvine, 5901 E Seventh St, Long Beach, CA 90822, United States. [astarnaw@uci.edu](mailto:astarnaw@uci.edu)

**1.8 Abstract.** An informative, structured abstract of no more than 350 words should accompany each manuscript. Abbreviations should be avoided, but if used should be

spelled out at first mention. The 5 sections of the structured abstract are: Background, Aim, Methods, Results, and Conclusion. Each section should adhere to the word count thresholds (indicated in parentheses) and the content guidelines below:

**BACKGROUND (no more than 100 words)**

This section should clearly describe the rationale for the study. It should end with a statement of the specific study hypothesis.

**AIM (no more than 20 words)**

The purpose of the study should be stated clearly, with no or minimal background information, following the format of: "To investigate/study/determine..."

**METHODS (no more than 80 words)**

This section should describe the materials and methods used for all of the data presented in the proceeding Results section of the abstract. This information should include the following details, as applicable: study design (*e.g.*, animal study, randomized controlled trial, cross sectional study, cohort study, case series, *etc.*); setting, please specify study location (*e.g.*, primary or tertiary care setting, hospital, general community, *etc.*); number of participants and how they were selected; intervention, the method of administration and the duration; and major statistical methods used.

**RESULTS (no more than 120 words)**

This section should describe the key findings of the study, including absolute values and risk differences. *P* values should be presented where appropriate, and not for data that did not reach the threshold of statistical significance. You must provide relevant data to

illustrate how the statistical values were obtained (*e.g.*,  $6.92 \pm 3.86$  vs  $3.61 \pm 1.67$ ,  $P < 0.001$ ).

#### CONCLUSION (no more than 30 words)

This section should succinctly and cogently present the findings and implications that are within the scope of the data you have presented in the preceding Results section of the abstract. You should state only conclusions that are directly supported by the evidence presented and the implications of the findings presented. This section should be written in the present tense.

**1.9 Key words.** The 'Key words' list will provide 5-10 keywords that reflect the main content of the study. Please do not use abbreviations for the keywords (*e.g.* Ulcerative colitis, not UC). The first letter of each keyword will be capitalized, and each keyword will be separated by a semicolon. For example:

**Key words:** Non-alcoholic fatty liver disease; Alcoholic liver disease; Non-alcoholic steatohepatitis; Animal models; Insulin resistance; Oxidative stress

**1.10 Core tip.** Please write a summary of no more than 100 words to present the core content of your manuscript, highlighting the most innovative and important findings and/or arguments. The purpose of the Core Tip is to attract readers' interest for reading the full version of your article and increasing the impact of your article in your field of study.

## 2 SECOND SECTION OF MANUSCRIPT WRITING

**2.1 Main text.** The main text will contain 7 sections, including Introduction, Materials and Methods, Results, Discussion, Conclusion, Acknowledgements, and References.

**2.2 Biostatistics.** Any manuscript describing a study (basic research and clinical research) that used biostatistics must include a statement in the Materials and Methods section affirming that the statistical review of the study was performed by a biomedical statistician. Statistical review is performed before the submission or after peer-review. The author(s) will invite an expert in Biomedical Statistics to evaluate the statistical method(s) used in the study, including but not limited to the *t*-test (group or paired comparisons), chi-square test, ridit, probit, logit and regression (linear, curvilinear, or stepwise) modeling, correlation, analysis of variance, and analysis of covariance. The review by the biomedical statistician is conducted with respect to the following points: (1) Statistical methods are adequately and appropriately described when they are used to verify the results; (2) Statistical techniques are suitable or correct, and compliant with the following Baishideng Publishing Group (*Baishideng*) directives; (3) Only homogeneous data can be averaged. Standard deviation (SD) is preferred to standard error (SE). The number of observations and subjects (*n*) is given. Losses in observations, such as drop-outs from the study, are reported; (4) Values, such as ED50, LD50, and IC50, have the 95% confidence limits calculated and have been compared by weighted probit modeling (using the functions described by Bliss and Finney); and (5) The word “significantly” is replaced by its synonyms (if it indicates extent) or the *P* value (if it indicates statistical significance). Statistical data should be expressed as mean  $\pm$  SD or mean  $\pm$  SE. Common statistical expressions are identified as: *t*-test as *t*; *F*-test as *F*; chi-square test as  $\chi^2$ ; relative coefficient as *r*; degree of freedom as *df*; number of samples as *n*; and probability as *P*.

**Sample wording:** The statistical methods of this study were reviewed by [name(s) of

individual(s)] from [name(s) of organization(s)]...

**Note:** If a biostatistics editor is employed by the authors, the person's name (first name and family (sur)name), qualifications, and contact information must be submitted to the editorial office in the form of a letter of confirmation of service. If the biostatistics editing was performed by a commercial service provider, the company's name and contact information, including URL and E-mail or phone number, must be submitted to the editorial office in the form of a letter of confirmation of service. The letters of confirmation of service must include the corresponding author's name (first name and family (sur)name) and contact information (E-mail and phone number), and the manuscript title.

**2.3 Units.** Use SI units. For example: body mass,  $m$  (B) = 78 kg; blood pressure,  $p$  (B) = 16.2/12.3 kPa; incubation time,  $t$  (incubation) = 96 h; blood glucose concentration,  $c$  (glucose) =  $6.4 \pm 2.1$  mmol/L; blood CEA mass concentration,  $p$  (CEA) = 8.6-24.5 g/L; CO<sub>2</sub> volume fraction, 50 mL/L CO<sub>2</sub>, not 5% CO<sub>2</sub>; likewise, for 40 g/L formaldehyde, not 10% formalin; and mass fraction, 8 ng/g, *etc.* Arabic numerals such as 23,243,641 (*i.e.* 23 million, 243 thousand, and 641) should be written as 23243641, with no commas or spaces. The format for how to accurately write common units and quantities can be found at: <https://www.wjgnet.com/bpg/gerinfo/189>.

**2.4 Illustrations.** Figures must be presented in the order that they appear in the main text of the manuscript (numbered as 1, 2, 3, *etc.*). All figures must have a detailed figure legend that provides a clear and comprehensive description of the information presented in the figure, so that the reader can understand without having to refer back to any other

portion of the manuscript.

It is necessary to keep all elements compiled in a line-art image. Scale bars (with the length of the bar defined in the legend text rather than on the bar itself) or magnification factors (with textual definition in the legend) can be used. Figure file names should identify the figure and panel. Avoid layering type directly over shaded or textured areas in the figure. Uniform presentation should be used for figures showing the same or similar contents; for example, **“Figure 1 Pathological changes of atrophic gastritis after treatment. A: ...; B: ...; C: ...; D: ...; E: ...; F: ...; G: ...”**.

**2.5 Tables.** Tables must be presented in the order that they appear in the main text of the manuscript (numbered as 1, 2, 3, *etc*). A brief, one-line title must be provided for each table. Detailed legends should not be included under tables, instead having the information presented in the main text where applicable; the information should complement, but not duplicate the text. Use one horizontal line under the title, a second under the column headings, and a third below the last row of the Table (being above any footnotes). Vertical lines and italics should be omitted.

Please note that tables embedded as Excel files within the manuscript are NOT acceptable. Tables made in Excel that are 2 pages or less should be transformed into a customized Word program table, using the ‘Insert Table’ function. Tables will be located at the very end of your article document, following the figures. Any tables submitted that are longer/larger than 2 pages will be published as online-only supplementary material.

Tables must be primarily cell-based and fully editable. Do not use the following to organize data or structure the table: (1) Returns (“Enter” key); (2) Tabs; (3) Spaces; (4) Colored text; (5) Cell shading; and (6) Cells within cells. The Software should be Word (preferred; embedded at the end of the manuscript file) or Excel (allowed for longer

tables presented as Supplementary Materials). *Baishideng* does not allow for graphics, boxes or embedded tables to appear in the main body of the manuscript.

**2.6 Notes in illustrations and tables.** Data with statistical significance in a figure or table should be denoted using superscripted alphabetical lettering, such as <sup>a</sup>*P* < 0.05 and <sup>b</sup>*P* < 0.01. If there are other series of *P* values, the alphabetical subscripted denotation format is continued, such as <sup>c</sup>*P* < 0.05 *vs* control, <sup>d</sup>*P* < 0.01 *vs* control, <sup>e</sup>*P* < 0.05 *vs* group A, and <sup>f</sup>*P* < 0.01 *vs* group B. Data that are not statistically significant should not be denoted, *i.e.* *P* > 0.05 is not an allowed denotation.

Other notes in tables or under illustrations should be expressed as F<sup>1</sup>, F<sup>2</sup>, F<sup>3</sup>, or sometimes as other superscripted symbols (Arabic numerals); for example, “F: Venn diagram. <sup>1</sup>Here, we excluded patients that preintervention was inconsistent with original treatment in our hospital.” In a multi-curve illustration, each curve should be labeled with ●, ○, ■, □, ▲, △, *etc*, in a specified sequence.

**2.7 Abbreviations.** Standard abbreviations should be defined in the abstract and in the main body of the manuscript upon first mention in the text. In general, terms should not be abbreviated unless they are used two times or more and the abbreviation is helpful to the reader. Permissible abbreviations are listed in Units, Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors (Ed. Baron DN, 1988) published by The Royal Society of Medicine, London. Certain commonly used abbreviations, such as DNA, RNA, HIV, LD50, PCR, HBV, ECG, WBC, RBC, CT, ESR, CSF, IgG, ELISA, PBS, ATP, EDTA, and mAb, do not need to be defined and can be used directly.

**2.8 Italics.** Quantities: *t*, time or temperature; *c*, concentration; *A*, area; *l*, length; *m*, mass; *V*, volume. Genotypes: *gyrA*, *arg 1*, *c myc*, *c fos*, *etc*. Restriction enzymes: *EcoRI*, *HindI*, *BamHI*, *Kbo I*, *Kpn I*, *etc*. Biological nomenclature: *H. pylori*, *E. coli*, *etc*. Latin terms: *i.e.*, *e.g.*,

*via, etc.*

**2.9 Acknowledgements.** Brief acknowledgements of persons who have made genuine contributions to the manuscript and who endorse the data and conclusions should be included. Authors are responsible for obtaining written permission to use any copyrighted text and/or illustrations.

**2.10 References.** *Observational Study* should be composed of detailed contents, comparisons, and evaluations in relation to other published relevant articles, and an in-depth discussion. Please don't use informal publications. For seminal references, however, the publication date is not strictly limited. You should always cite references that are relevant to your article. Citing more than five references in a single citation, even when separated by a hyphen, should be avoided; for example [1-6], [2-14], and [1,3,4-10,22] are all considered inappropriate reference citations. Moreover, authors should not cite their own unrelated published articles. Citation of references not indexed on PubMed is discouraged, but if a reference that is not indexed by PubMed is necessary, you must provide *Baishideng* with a printed copy of the first page of the full article. Please update the format of all the references according to the Format for references guidelines. The accuracy of the information of journal citations is very important. We will interlink all references with DOIs in an XML file, so that readers can immediately access the abstracts of cited articles online.

This section includes Coding system, PMID and DOI, Style for journal references, Style for book references, and Format for references (Examples). Specific requirements are as follows:

**(1) Coding system**

The author should number the references in Arabic numerals according to the citation

order in the text. The reference numbers will be superscripted in square brackets at the end of the sentence with the citation content or after the cited author's name, with no spaces. For example, "Crohn's disease (CD) is associated with increased intestinal permeability<sup>[1,2]</sup>." If references are cited directly in the text, they should be included with the direct citation content within the text; for example, "From references<sup>[19,22-24]</sup>, we know that...". Before submitting your manuscript, please ensure that the order of citations in the text is the same as in the references section, and also ensure the spelling accuracy of the authors' names. Do not list the same citation twice (*i.e.* with two different numbers).

## **(2) PMID and DOI**

Please provide the PMID number, which is the serial number that roots the abstract for that publication into the PubMed index, and the CrossRef DOI® (Digital Object Identifier) name, which is a unique string created to identify a piece of scholarly content in the online environment for each reference in the References section. The PMID number can be found at <http://www.ncbi.nlm.nih.gov/pubmed> and the DOI name at <http://www.crossref.org/SimpleTextQuery/>. The numbers will be used in the electronic (E)-version of the manuscript.

## **(3) Style for journal references**

For authors' names, the name of the first author should be typed in bold letters; the family (sur)name of all authors should be typed with the first letter capitalized, followed by their abbreviated first and middle initials. For example, an article by Lian-Sheng Ma and Bo-Rong Pan will be written as Ma LS and Pan BR. The title of the cited article will be written in sentence case. The journal title will be written in its abbreviated form (as shown in PubMed) in italics and followed by the article publication information (not italicized), including the publication date, volume number (in bold numbers), and start page through end page (separated by a hyphen, with no space). The PMID and DOI will follow this information and be written as "[PMID: 11819634 DOI: 10.3748/wjg.13.5396]".

## **(4) Style for book references**

**Baishideng  
Publishing  
Group**

7041 Koll Center Parkway, Suite  
160, Pleasanton, CA 94566, USA  
**Telephone:** +1-925-399-1568  
**E-mail:** office@baishideng.com  
**https://**www.wjgnet.com

For the authors' names, the name of the first author should be typed in bold letters. The family (sur)name of all authors should be typed with the initial letter capitalized, followed by their abbreviated first and middle initials. The book title will follow the authors' names and not be italicized. The publication information will follow, written as punctuated here: publication number, publication place: publication press, year: start page-end page.

*Baishideng* uses the reference style outlined by the International Committee of Medical Journal Editors (ICMJE), also referred to as the "Vancouver" style. Example formats are listed below. Additional examples are in the [ICMJE sample references](#).

Journal name abbreviations should be those found in the [National Center for Biotechnology Information databases](#).

**23 Hitchcock A,** producer and director. Rear Window [Film]; 1954. Los Angeles: MGM.

#### **3 ETHICS POLICIES/STATEMENTS**

**3.1 Institutional review board.** Any article describing a study (basic research and clinical research) involving human and/or animal subjects is required to have the institutional review board (IRB) name, whether institutional (part of the author(s)' academic/medical institution, such as the Oak Grove Children's Hospital Institutional Review Board) or commercial/independent/private (contracted for-profit organizations, such as the ClinicCare Coalition for Human Rights Institutional Review Board), stated explicitly in the Footnotes section.

**3.2 Informed consent.** Any research article describing a study involving humans should contain a statement in the Footnotes section clearly stating that all involved persons (subjects or legally authorized representative) gave their informed consent (written or verbal, as appropriate) prior to study inclusion. In general, the *Baishideng* requires that any and all details that might disclose the identity of the subjects under study should be omitted or anonymized. In the rare situation that a study participant's identifiable information is crucial to the research, the statement of informed consent is absolutely necessary, unless the participant is deceased.

**3.3 Conflict-of-interest.** A conflict-of-interest statement is required for all articles and study types. In the interests of transparency and helping reviewers to assess any potential bias in a study's design, interpretation of its results, or presentation of its scientific/medical content, the *Baishideng* requires all authors of each paper to declare in the Footnotes section any conflicting interests (including but not limited to commercial, personal, political, intellectual, or religious interests) that are related to the work submitted for consideration of publication.

#### **4 LANGUAGE EDITING FOR MANUSCRIPTS SUBMITTED BY NON-NATIVE SPEAKERS OF ENGLISH**

We will, with the right attitude and approach, cooperate with authors who are not native speakers of English so that they may successfully complete the final publication of their manuscripts. Quality control of a manuscript's language is not negotiable with the *Baishideng* or any of its journals. The language of the manuscript must meet the requirements of academic publishing.

For manuscripts submitted by non-native speakers of English, the authors are required to provide a language editing certificate which will serve to verify that the language of the manuscript has reached Grade A. Before the manuscript is finally published, the language of the manuscript must also pass the proofreading test by an English language editor (native or non-native) who will be designated at the discretion of the journal's editorial office.

We strongly recommend that authors use language editing services provided by the following biomedical editing companies, based on their good reputation and reliable quality:

**Filipodia Publishing, LLC:** <http://www.filipodia.com/>

**MedE Editing Group:** <http://meditorexpert.com>

**American Journal Experts:** <http://www.aje.com>

**Nature Publishing Group Language Editing:** <http://languageediting.nature.com>

**Medjaden:** <https://en.medjaden.com/>

**Editage:** <https://www.editage.com/>

**Enago:** <https://www.enago.com/>

**Elsevier:** <https://webshop.elsevier.com/language-editing-services/language-editing/>

**Wiley:** <https://www.wileyeditingservices.com/en/>

**Charlesworth:** <https://www.cwauthors.com/>

These companies often provide several different types of language editing services, typically including proofreading, standard editing, extensive editing, and rewriting. We strongly recommend that authors use the extensive editing service so as to completely address the language problems of the manuscript. For example, extensive editing will involve editing the manuscript for proper grammar and spelling and the correct usage of articles, prepositions, conjunctions, abbreviations, punctuation, italic font of Latin words, biomedical terms, tenses, active voice and passive voice, and sentence structure, as well as checking of the academic rules and norms, and for scientific misconduct, details of the materials and methods, manuscript integrity, manuscript title appropriateness, logical organization of the Introduction, Results and Discussion sections, and image features.

After authors confirm the revisions made during the professional editing process, the companies listed above should provide authors with an official manuscript language editing certificate, through which the company guarantees that the language of the manuscript has reached Grade A.

## **5 STEPS FOR SUBMITTING MANUSCRIPTS**

**Step 1: Create an account for correspondence.** Please open the *F6Publishing* page (<https://www.f6publishing.com/Forms/Main/Login.aspx>) and click ‘Corresponding Author Register’ to provide the corresponding author’s Personal Information and Institution-Related Information. When the complete information has been typed in, please click the Submit button, and the system will automatically send you a user name and password *via* e-mail.

**Baishideng  
Publishing  
Group**

7041 Koll Center Parkway, Suite  
160, Pleasanton, CA 94566, USA  
**Telephone:** +1-925-399-1568  
**E-mail:** office@baishideng.com  
**https://**www.wjgnet.com

**Note:** The corresponding author's ORCID number will need to be submitted when creating an account for correspondence. To obtain an ORCID number, please visit: <https://orcid.org/>.

**Step 2: Login to *F6Publishing*.** After receipt of the user name and password for the corresponding author, please login to *F6Publishing* by clicking 'Author Login'. After login, click 'Start New Submission' and find the Manuscript General Information zone, in which the corresponding author should fill in the information for the fields of Journal, Manuscript Title, Country of Manuscript Source, Manuscript Source, Invited Manuscript ID, Funding Agency and Grant Number, Manuscript Scope, Specialty, Manuscript Type, Abstract, Keywords, Core Tip, and Cover Letter. After information in all fields is completed, click either 'Save & Continue' or 'Skip & Continue'. If you want to modify the information at this step, please click 'Go Back'.

**Note:** In the *F6Publishing* system, the \* denotes Required Fields.

**Step 3: All author list.** The corresponding author submits the information for all authors in an order based on their contributions to the manuscript. Personal Information and Institution-Related Information should be submitted for each author. The corresponding author should ensure that all information provided for the Institution-Related Information and Correspondence To fields is correct.

**Note:** Please check the box in front of 'Is Corresponding Author' to confirm and formally attest to the corresponding author status for the person providing the information.

**Step 4: Upload manuscript and relevant files.** The full manuscript, including main text,

table(s), and figure(s) should be uploaded at one time. Please embed the main text, table(s), and figure(s) in a single manuscript file (Word or PDF) and remove all editing tracks and notes. While there are no writing or formatting restrictions for the first submission of the manuscript, it is recommended that the authors write a high-quality academic article according to the Guidelines for Authors before submitting. The ethics and relevant document(s) required for the *Observational Study* and the methods for uploading these documents are described below:

Manuscript Type	Name(s) of ethics and relevant documents required	Sample
Observational Study	<b>(1 of 5) Institutional Review Board Approval Form or Document</b>  It is recommended that the authors upload this important document required for research involving humans/animals if relevant to the study design (e. g. fully in vitro studies do not require IRB approval). The document is closely related to peer review and first-decision making for the manuscript.	<a href="#">Download</a>
	<b>(2 of 5) Signed Informed Consent Form(s) or Document(s)</b>  It is recommended that the authors upload this important document required for research involving humans. The document is closely related to peer review and first-decision making for the manuscript.	<a href="#">Download</a>

	<p><b>(3 of 5) Biostatistics Review Certificate</b></p> <p>It is recommended that the authors upload this important document required for studies using biostatistics, which is closely related to peer review and first-decision making for the manuscript.</p>	<a href="#">Download</a>
	<p><b>(4 of 5) STROBE Statement</b></p> <p>It is recommended that the authors upload this important document related to manuscript writing of observational/case control/retrospective cohort studies. The document is closely related to peer review and first-decision making for the manuscript.</p>	<a href="#">Download</a>
	<p><b>(5 of 5) Non-Native Speakers of English Editing Certificate</b></p> <p>It is recommended that non-native English-speaking authors improve the language quality of their manuscript before submitting, as this feature is closely related to peer review and first-decision making for the manuscript. Please use language editing services provided by our recognized high-quality biomedical editing companies, as shown in: <a href="https://www.wjgnet.com/bpg/gerinfo/240">https://www.wjgnet.com/bpg/gerinfo/240</a>.</p>	<a href="#">Download</a>

Click the radio button (left screen) for the file type you will upload. Then, select the corresponding file(s) you will upload by clicking the 'Browse' button (right screen) and

choosing the file from your computer system. The file(s) you have selected for uploading will appear in the 'Uploaded Files' box. The full manuscript, including main text, table(s), and figure(s) should be uploaded at one time. Please embed the main text, table(s), and figure(s) in a single manuscript file (Word or PDF) and remove all editing tracks and notes.

**Note:** After the manuscript and related documents are uploaded, click the 'Continue' button to preview the submitted information and documents, and then click the 'Submit' button to submit all documents. Once the documents are submitted, no further changes are allowed.

After the submission, all authors will receive an e-mail notification of receipt of the manuscript. If authors have not received the manuscript receipt or if they encountered technical problems when uploading the manuscript, please contact the *F6Publishing* team via the Help Desk (<https://www.f6publishing.com/Helpdesk>) or by sending an e-mail to [submission@wjgnet.com](mailto:submission@wjgnet.com).

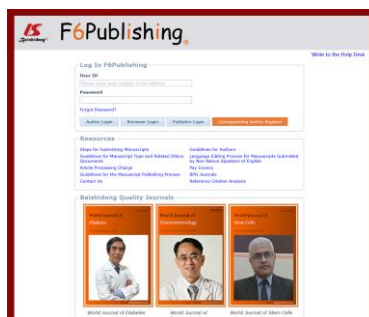

## **6 BAISHIDENG HOMEPAGE, SUBMISSION SITE AND MANUSCRIPT TYPES**

**6.1 F6Publishing:** <https://www.f6publishing.com>. You are welcomed to submit your manuscript to the *Baishideng* series of journals via F6Publishing. Manuscript Types Accepted: Editorial, Frontier, Guidelines, Expert Consensus, Field of Vision, Minireview, Review, Opinion Review, Case Control Study, Clinical Trials Study, Observational Study, Prospective Study, Randomized Clinical Trial, Randomized Controlled Trial, Retrospective Cohort Study, Retrospective Study, Basic Study, Evidence-Based Medicine, Systematic Review, Meta-Analysis, Scientometrics, Case Report, Letter to the Editor, Correction, and Retraction Note.

## 7 BAISHIDENG DISTINGUISHED AWARD FOR BAISHIDENG JOURNALS' PUBLISHED ARTICLES

The "Baishideng Distinguished Award" (BDA) was established to praise the authors who have made outstanding contributions by publishing original and innovative studies in any of the open-access journals of *Baishideng*. Their publications represent meaningful contributions towards promoting the ability of readers to learn from the latest research results actively moving the development of medical science forward. The BDA is based upon tracking of the quality of articles and subsequently awarded to the selected corresponding authors.

### Selection methods

Editor(s)-in-Chief of the *Baishideng* journals are responsible for selecting candidates of

**Baishideng

160, Pleasanton, CA 94566, USA  
**Telephone:** +1-925-399-1568  
**E-mail:** office@baishideng.com  
**https://**www.wjgnet.com

the annual *BDA*. There are three levels of awards, namely First Prize, Second Prize, and Third Prize, and the respective certificates and bonuses will be issued by *Baishideng*. Original innovative Basic Research, Clinical Research, Frontier, Review, Guideline, Systematic Review, Meta-Analysis, and Case Report articles will be considered for the award.

#### *Award amounts*

The *BDA* prizes are \$5000 for the First Prize, \$3000 for the Second Prize, and \$2000 for the Third Prize. The list of *BDA* winners will be formally announced on the official website of *Baishideng*.

#### *Criteria for the annual BDA*

**First Prize:** Article scientific quality is given triple-A rating by peer-reviewers prior to publication, and after publication the article is given three First Prize recommendations by the editorial board members when they track the scientific quality of the article, or the number of citations reaches more than 30 in the year, excluding self-citations.

**Second Prize:** Article scientific quality is given double-A rating by peer-reviewers prior to publication, and after publication the article is given three Second Prize recommendations by the editorial board members when they track the scientific quality of the article, or the number of citations reaches 20 in the year, excluding self-citations.

**Third Prize:** Article scientific quality is given triple-B rating by peer-reviewers prior to publication, and after publication the article is given three Third Prize recommendations by the editorial board members when they track the scientific quality of the article, or the

number of citations reaches 10 in the year, excluding self-citations.

## 8 ARTICLE PROCESSING CHARGE

For manuscripts invited by the Editorial Office, the *Article Processing Charge* (APC) is fully waived. For unsolicited manuscripts, the APC is required for some of our journals but not all. Details on the APC policy of the open-access and peer-reviewed academic journals edited and published by the Baishideng Publishing Group can be found at: <https://www.wjgnet.com/bpg/gerinfo/242>.
