ABOUT THE BPG

Baishideng Publishing Group Inc was built upon the knowledge and experience gained with its predecessor, Baishideng Publishing Group Co., Limited and launched on July 07, 2010 as a specialized publisher that mainly engages in editing, publishing, and distribution of the World series medical journals. The earliest publication of the Baishideng Publishing Group (BPG) dates back to January 15, 1993 (the Chinese language *Journal of New Digestology*, renamed *Shijie Huaren Xiaobua Zazhi/World Chinese Journal of Digestology* on January 15, 1999), which was followed on October 01, 1995 by the English language *China National Journal of New Gastroenterology* (renamed *World Journal of Gastroenterology (WJG)* on January 15, 1998). In order to effectively edit and publish these two journals, the Baishideng BioMed Scientific Co., Ltd. was established on December 11, 2006. Today, BPG maintains its dedication to a sustainable publication business model that provides top-quality journals reporting clinical and basic research in a broad range of fields by following the highest international standards for ethics in publishing and research.

BPG currently publishes 43 printed or online journals (42 in English and one in Chinese), 23 of which are indexed in the PubMed Central, PubMed, and Directory of Open Access Journals databases. The high-quality articles that are published in the BPG journals and are included in PubMed Central are accessed by approximately 33813 worldwide users on a daily basis.

BPG uses an open-access and peer-review publishing model to support our goals of maximizing benefits to

readers, authors and editors by promoting the open and transparent exchange of ideas and research findings among scientists as well as members of the public. Our journals cover a wide range of topics, including anesthesiology, biochemistry and molecular biology, cardiology, critical care medicine, dentistry and stomatology, dermatology, diabetes, experimental medicine, gastroenterology and hepatology, hematology, immunology, infectious diseases, medical genetics, medical imaging, methodology, nephrology, neurology, obstetrics and gynecology, oncology, ophthalmology, orthopedics, otorhinolaryngology, pediatrics, pharmacology, psychiatry, respirology, rheumatology, surgery, translational medicine, transplantation, urology, and virology.
